

**High-end 27" WQHD monitor supporting FreeSync™ technology and 1ms response time**

The ProLite B2783QSU is an excellent 27" WQHD LED-backlit monitor bringing the world of Business and Gaming together. The monitor offers accurate and consistent colour reproduction with wide viewing angles and a sharp high resolution 2560x1440 panel. Its ergonomic stand offers 13cm height adjustment with pivot and swivel, making this screen suitable for a wide range of applications and environments where workplace flexibility and ergonomics are key factors. This monitor supports FreeSync™ technology, offering gamers the chance to experience fluid and fracture free gaming. Triple input (DVI/HDMI/DisplayPort) and a USB HUB ensure compatibility with your desktop PC or Notebook.

**FreeSync™ Technology**

AMD FreeSync™ technology puts an end to choppy gameplay and broken frames with fluid, artifact-free performance at virtually any framerate.

**Blue light reducer**

As we all know looking at a monitor screen for several hours per day, especially from a closer distance, causes eye fatigue. This effect is much stronger with computer screens than with TV equipment. One of the factors responsible for this phenomenon is the blue light emitted by the screen. Therefore reducing the amount of blue light ultimately allows our eyes to feel less tired while working long hours with a computer screen. We achieved it by adjusting the monitor's brightness and color temperature through a new feature called "Blue light reduction" easily accessible through the monitor's OSD menu.
